Short Description

The Chiappa M1-9 carbine offers the quality of a factory new rifle with plenty of spare parts and accessories available; an undisputable advantage over the plentiful vintage .30-caliber M1 carbines on the market is that in several Countries (mostly European), 9mm ammunition is cheaper and easier to find than .30-M1 Carbine, and is also available in a plethora of variants, while .30-M1 is basically only available in standard 110-grain FMJ round nose loads.
