

Kel-Tec KSG 12 Gauge

Availability: 2 - 3 Days

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Call for Price: 814.365.7028

Short Description

The Kel-Tec Shotgun is pump-action and chambered for 12 gauge. Kel-Tec used its RFB as a template to build the KSG, its first shotgun. The KSG has an interesting design. It has two tubular magazines that hold seven shells a piece, so 14 total, and it ejects spent shells downward instead of to the side. To change mags all the shooter has to do is flip a switch. It is also very compact at 26.1" in total length and weighs 6.9 pounds.
